ASTON CONSULTING AG

ABOUT US

EXPERIENCE. PASSION. MOTIVATION. TEAMWORK.

At Aston Consulting AG, based in Zug, we pair Swiss precision with global business intelligence. We help companies, institutions and decision-makers transform data into strategic value, through structure, insight and execution.

We provide a tailored suite of BI-driven advisory services, ranging from financial process optimization to performance analytics, reporting automation, and technology-enabled decision support. Our bespoke consulting approach bridges traditional process consulting with next-generation automation, giving your organization both structure and speed.

Our in-house team of finance, tech and analytics experts collaborates seamlessly, removing silos and enabling data-backed clarity at every level of your organization. Our consulting platform scales with your data maturity and operational ambitions — quietly, efficiently, and with measurable value.

Business intelligence means more than dashboards and KPIs.
It is about delivering clarity, foresight, and competitive edge.

BUSINESS INTELLIGENCE

TRANSFORMING PROCESS INTO PERFORMANCE

In a world defined by data and driven by speed, organizations no longer compete on instinct—they compete on insight. At Aston Consulting, we help companies move from fragmented information to cohesive intelligence, from complexity to clarity. Our Business Intelligence (BI) Consulting practice integrates deep process expertise with advanced digital tools to unlock actionable value across every layer of your organization. We don't offer plug-and-play consulting.

We listen before we architect, and we tailor before we automate. Every engagement is bespoke, designed around your strategy, your infrastructure, and your ambition. Because in a world of off-the-shelf solutions, your edge lies in what's made-to-measure. Today's business landscape rewards organizations that automate wisely.

We implement and integrate next-generation tools, while layering in RPA (Robotic Process Automation) and AI-enhanced analytics to deliver predictive insights and automate routine reporting cycles. Our automation playbooks engineered with your industry, regulatory context, and data maturity in mind.

Our roots lie in classical process consulting: lean design, systems thinking, and operational efficiency. We partner with CFOs, COOs, and transformation leaders to streamline business workflows, reduce decision latency, and uncover process bottlenecks that silently erode margin and agility. But we don't stop at diagnostics.

We execute. Our consultants co-create tailored BI strategies that connect legacy systems with modern architectures, ensuring scalability, visibility, and control. Whether your organization is seeking a unified data layer across entities or real-time analytics for operational decision-making, we architect sustainable solutions, not short-term fixes.

True business intelligence isn't about more data—it's about better decisions. We build governance-ready BI environments where accuracy, traceability, and trust are non-negotiable. Through dynamic dashboards, cross-functional KPI alignment, and self-service analytics capabilities, we put your teams in control of their data, without dependence on IT gatekeepers.

WHY SWITZERLAND?

REPUTATION. CURRENCY. RETIREMENT. CONSISTENT TAX AND LAW REGIME.

A good family office will not only manage its clients' wealth, it will work above all to safeguard it, especially if the clients live in unstable countries. Consequently, location is an important factor when choosing a family office. It needs to be based in a very **politically and economically stable country** offering a wide range of quality services and first-rate infrastructure. The **Swiss finance and banking sector is both unique and extremely carefree** and buoyant. Switzerland has long been considered the **world's leading financial centre** for high net worth wealth management.

Over the last few years, it has also earned itself a **strong reputation for currency** and raw materials trading and fund management. Switzerland is politically and economically stable with a **secure legal system, excellent financial services and a long tradition of private banking**, insurance and independent wealth management. Swiss people are known for their **competence in foreign languages, a central position in Europe, modern, reliable infrastructure** and an ability to adapt to different cultures. Swiss law prioritises freedom, privacy and individual property.

The assets of foreigners are treated in exactly the same way as those belonging to Swiss nationals. Banking and wealth management are protected by bank secrecy laws, as defined in Article 47 of the Federal Law on Banks and Savings Banks. Switzerland has withstood various financial crises, thanks to consistent growth based on wide diversification and strong domestic demand. It has a very low level of government debt and is one of the last countries **still holding an AAA rating**. In addition, Switzerland has one of the world's highest standards of living. It has an **attractive corporate tax regime**. In certain cantons, tax rates are very low and the country has signed numerous double taxation treaties. The **Swiss franc has consistently risen** in value over recent years, has a **long-standing international reputation** as a **safe-haven currency**.
